

Hytera Products in “Model Class” DS-6210 for DMR Interoperability
Testing – Certificate Document 10012 Tier III Hytera DS-6210 SYS and
Harris HDP 150 MS

DMR Association definition of Model Class (Section 1.3.13):

“A set of products that a manufacturer has determined, through engineering analysis or internal functional testing, to be functionally equivalent” *

DMR Association statement on declaration of Model Class:

“When test reports are formally verified by the DMR Association and a certificate of interoperability has been issued, or at a later date if appropriate, a manufacturer may declare, in a document signed by an authorized representative of the manufacturer, all products that belong to the Model Class of the product tested. All such products are eligible to be stated as interoperable by the manufacturer as if they had been used in the formal test process.” *

Hytera has determined by the criteria set out by the DMR Association that Hytera DS-6211 SYS models are in the same Model Class as the DS-6210 (IOP 20.03.012).
