

PROPULSION™

**Graphics rich,
fully customizable
Radio Control over
IP (RCoIP) dispatch
solution for Project 25,
DMR, Broadband
MCPTT and other PTT
over Cellular Systems.**

A strength of **Propulsion™** is the touch screen compatible, infinitely configurable user interface, which displays Unit IDs, Emergency, and Call History. Dispatchers can simulselect or patch many channels with intuitive graphical controls, instantly transmit on each resource, uniquely set the volume for each resource and differentiate audio on select and unselect speakers.

Dispatchers can replay recent calls with a single click, and each agency can add custom graphics to accelerate recognition of who is talking.

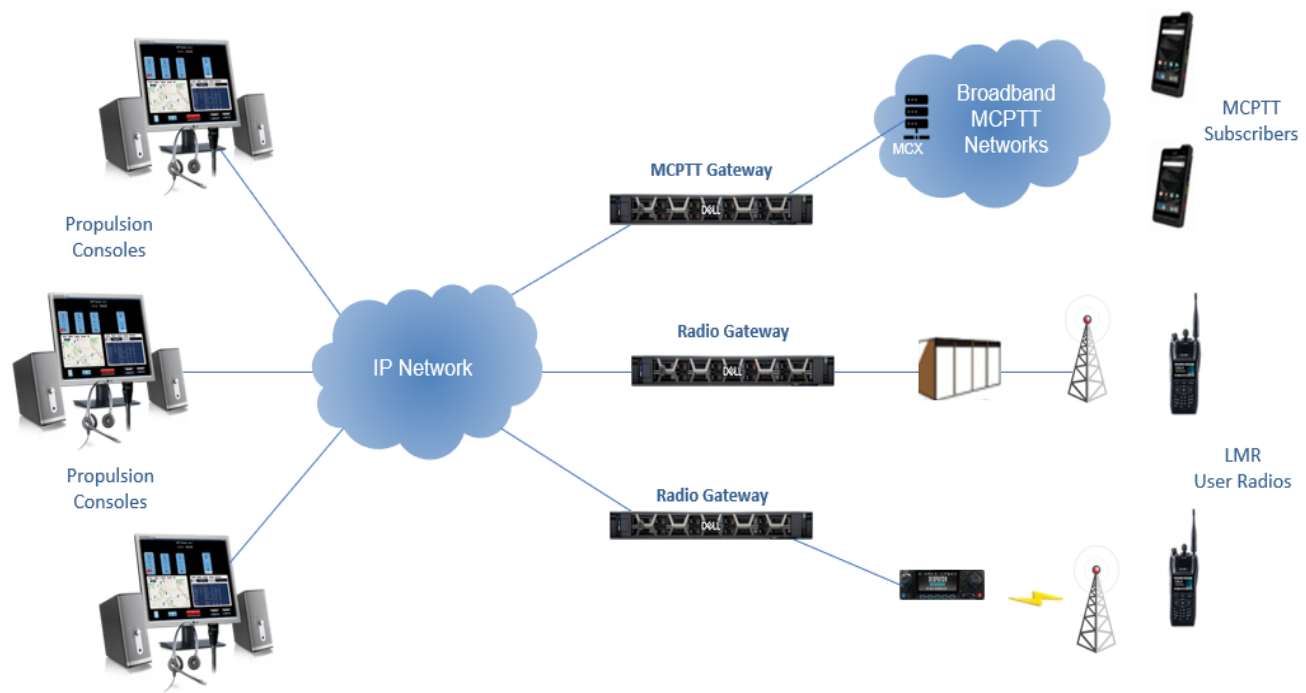

Catalyst's field proven design protects critical communications from being lost while radio systems assign channels and due to network congestion.

Propulsion™ - Take advantage of a variety of commercial off the shelf computer and display alternatives to precisely match the needs of your organization.

Catalyst Propulsion™ System Advantages

- ((.)) Customizable User Interface with Intuitive Controls**
- ((.)) Scalable to hundreds of Consoles communicating with hundreds of gateways on a single network**
- ((.)) Supports most Critical Communications Systems: P25, DMR, MCPTT, legacy, trunked, conventional, etc.**
- ((.)) Intuitive Patch and Interoperability Management**
- ((.)) Fault Tolerant Architecture**
- ((.)) Integrated Paging, Telephony and Intercom Support**
- ((.)) Dispatch and Interoperability between LMR, Broadband and Telephony networks**

Propulsion™ communicates over Internet Protocol (IP) based networks with radio Gateways that transmit and receive voice and control radio systems. These radio Gateways control the widest variety of radio resources in the industry:

- P25 CSSI
- P25 DFSI
- DMR AIS
- Manufacturer Specific Protocols
- Tone Control
- DC Control
- 3GPP MCPTT Client Interface
- SIP/PSTN

Catalyst offers a complete line of quality accessories:

- Telephony Control Unit
- Headsets
- Speakers
- Gooseneck and Desktop Microphones
- Foot Switches
- Auxiliary Input / Output
- Traditional and Touchscreen Monitors

Console Capabilities

The Propulsion Console provides an infinitely configurable, modern graphical user interface that is easy to learn and touchscreen compatible. The Critical Communications advantages of Propulsion include:

- Unit ID for MCPTT, DMR, P25 and MDC1200 with Centralized Alias Database
- Detailed, real-time Call Logging
- Emergency Indication from field units (depending upon radio)
- Individual Volume Controls
- Integrated Instant Recall Recorder Option with sequential call playback
- Integrates with Catalyst's InterLoc™ advanced location services solution
