DMR Association announces completion of three interoperability testing sessions

London, UK - 3 April 2013 - The Digital Mobile Radio (DMR) Association today announces the completion of three further successful DMR interoperability test sessions. Two sessions were for DMR Tier III (trunked operation) and the third session for Tier II (conventional operation). The Tier II tests took place between Hytera Communications and Kirisun. The Tier III sessions took place between Hytera Communications (infrastructure) and Harris Corporation (terminals) and Harris Corporation (infrastructure) and Hytera Communications (terminals).

The completion of these tests brings the total number of DMR bilateral test sessions completed to 12 and the number of radio manufacturers that have participated in test sessions to 9.

Andy Grimmett (Team Simoco), chair of the DMR Association Technical Working Group said "These latest interoperability tests demonstrate the strength of commitment that DMR manufacturers have to standards compliance. The number of bilateral test sessions completed for both Tier II (conventional) and Tier III (trunking) offers real vendor choice for users of professional digital mobile radio."

DMR Tier II mandatory features tested were: Group Call, Individual Call (PATCS), Individual Call OACSU, All Call and Emergency call.

DMR Tier II optional features tested were: Radio Check, Call Alert, Radio Enable/Disable, Remote Monitor, and Emergency Alarm Service.

DMR Tier III Mandatory features tested were: Registration, single site talk group voice call service, single site individual voice call service using OACSU on single frequency pair, single site individual voice call service using OACSU, single site individual voice call service using FOACSU, control channel hunting, single site short data message (text).

DMR Tier III Optional features tested in the sessions were: Multisite talkgroup voice call services, individual multisite voice call service using OACSU and FOACSU and multisite short data messages.

Details of specific products and features tested in the sessions are available on the DMR Association website at: <http://dmrassociation.org/?cat=6>

About DMR

DMR (Digital Mobile Radio) is a globally-available open digital radio standard for Professional Mobile Radio users, developed by the European Telecommunications Standards Institute (ETSI).

About the DMR Association

The DMR Association is focused on building on the success of the DMR standard through a combination of interoperability testing, certification, education and awareness. The Association also seeks to ensure that buyers of DMR technology gain value through the competition and choice derived from products built to an open multi-vendor standard.

The DMR Association includes members representing a broad cross-section of the industry, including some of the world's leading device and network suppliers. Members of the DMR Association include Aselsan, Avtec, Fujian Beifeng Telecom Technology Co., Ltd., CML Microcircuits, Eastern Communications, EMC S.p.A, Fylde Micro, Harris, Hytera, Icom, Kenwood, Kirisun, Larimart, Motorola Solutions, Omsk Manufacturing Association, Radio Activity, Radiodata, Selex ES, Sepura, Simoco, Tait Communications, Vertex Standard, Xiamen puxing electronics science & technology co.,ltd., Zetron, Aeroflex, Anritsu, Bosch Security, Catalyst Communications, Elcomplus, Etherstack, fjord-e-design, Logic Wireless Ltd., Neocom Software, Omnitronics, Prescom , Raven, Electronics Corporation, SafeMobile, Shanghai 3G, Telent, Twisted Pair Solutions, Unicom, Wuhan, Xworks, Advent Ltd, Atlantic Telecommunications, BriCom Solutions, CIM Concepts, Democom , ESP Wireless, Fisher Wireless Services, Gencom, Pro-Tec Mobile Communications, Rayfield Communications, Repeater Network LLC, Saia Communications and Trbocom.
