

## Model Class Declaration

Certificate 2015-011 with  
ZTE DH620G

### **DMR Association definition of a Model Class (Section 1.3.13)**

A set of products that a Manufacturer has determined, through engineering analysis or internal functional testing, to be functionally equivalent are considered a “Model Class”.

When test reports are formally verified by the DMR Association and a certificate of interoperability has been issued, or at a later date if appropriate, a Manufacturer may declare, in a document signed by an authorized representative of the Manufacturer, all products that belong to the Model Class of the product tested. All such products are eligible to be stated as interoperable by the Manufacturer as if they had been used in the formal test process. A Model Class declaration can be issued by a DMR Association member whose Laboratory recognition is still valid. In case of rebranding, a Model Class declaration can contain also Models of another company; in this case that company shall be a DMR Association member and its name shall be specified in the Model Class declaration.

DMR Association Interoperability Laboratory Recognition Process & Test Session Procedures V.2.0 March 2014

JVCKENWOOD has determined by the criteria set out by the DMR Association that the following models are in the same Model Class as TKR-D810, which have been tested & passed for IOP by DMR (TWG) Laboratory.

TKR-D710	NXR-1700	
	NXR-1800
